### Experience

MySQLPythonSQL ServerTableauPower BIAWSPostgreSQLData Engineer

## About me

Have architected a data warehouse(Data Mesh) from scratch from S3 as a data lake to Snowflake as a data warehouse. Have handled data from multiple data platform for example Samsung Pay. Have handle a design of data warehouse which is able to scale more than 15TBs of data. Have mentored a team size more than 7+. Was involved in recruiting, and data profile selection process. Was involved in scrum process implementation for the first time in the team and designing agile process.
