About me

PROFESSIONAL SUMMARY â€¢ 8+ Years of total working experience as JAVA Developer â€¢ Developing applications for mission-critical systems and delivering high-availability & performance â€¢ Assuring that the designs are following specifications â€¢ Ability to develop new applications and creative resolution for complex technical problems â€¢ Experience with WEB technologies like Ajax, CSS, Java Script, jQuery â€¢ Experience with development of Smart Contract with Solidity in Ethereum â€¢ Experience with development of Dapps with using Ethereumâ€™s Web3.JS library â€¢ Experience in the ERC20, ERC721, ERC1155 and ERC721A standards of Ethereum â€¢ Expertise in handling the team of developers in the mission critical project â€¢ Experience in managing the agile team being in a role of scrum master CERTIFICATION â€¢ OCPJP: Oracle Certified Professional Java SE 6 Programmer

Education

MCA, 2014
Nirma University
Ahmedabad

Experience

Technical Team Leader

Techforce Global, Ahmedabad

From 01 Apr, 2015 - Currently Working

Projects added here are all done with Techforce Global

Java Developer

I Brain Club, Ahmedabad

From 28 Jul, 2014 - 31 Mar, 2015

Before April 2015, Techforce was a partnership firm - I Brain Club

---

Portfolio

Reputed County of US

From 03 Sep, 2015 - Currently Ongoing

â€¢ Technology stack: JSP, Servlet, Spring MVC, Spring JDBC, JSF etc. â€¢ This project is developed for Circuit Court of one of the County in USA. Which includes DUCS (swing-based desktop application), IUCS and Leader projects. The project is for the Legal domain. â€¢ Which manages and automates all the tasks of the Circuit Court from stopping the defendant to making a case on him and managing attorneys etc.

PayTech Portal

From 15 Mar, 2016 - 31 Aug, 2021

â€¢ Web Based Application (Maven, Spring MVC, Spring REST, Spring Security, MySQL, GIT, JUnit, Velocity Template) â€¢ APEXX Portal project is mainly developed for the use of merchants of Apexx project APIs. â€¢ Using Apexx Portal merchants will be able to see the latest statuses of their transaction done via Apexx APIs. â€¢ Apexx Portal enables Admin users to manage the complex configurations of the payment gateways easily from the UI.

PayTech Integration

From 15 Mar, 2016 - 31 Aug, 2021

â€¢ Web Based Application (Maven, Spring MVC, Spring REST, MySQL, GIT, JUnit, Velocity Template) â€¢ APEXX consolidates global payment providers into a single integration point, Optimizing the cost of complex payment ecosystems. (Micro service architecture) â€¢ This product links all types of players in the payments industry via single integration.

TUG â€“ The Universal Gateway

From 13 Jan, 2016 - 24 Jun, 2016

• Technology stack: Maven Multi Modules, Spring Boot, Spring MVC, Spring Data JPA, Spring Security with MySQL & Mongo DB, Velocity Template, thyme leaf • TUG application as the name suggests is developed with the vision to make it as The Universal Gateway. • That means if anyone from any industry wants to integrate their application with any third-party APIs they can simply integrate with TUG and the rest is TUG's responsibility. • It is like integrate once and use with many. End client need not to worry about the complexity of the new integration they might need they just need to pass those details to TUG and then it can provide the details to access those API via TUG within very less time. • TUG can be used for any integration starting from payment gateways, KYC services, FX etc.

GAIA – GEP Tokens

From 01 Mar, 2018 - 30 Sep, 2018

• Technology stack: Ethereum network, ERC20 standards, OpenZeppelin framework, Solidity • We have created custom cryptocurrency with the ERC20 standard for the client in this project. • We have given them a platform where they can make their customers to pay for the tokens they want to buy. The tokens are live.

CxR

From 01 Feb, 2017 - 31 Oct, 2017

• Technology stack: JSP, Spring MVC, Bootstrap 4, Cassandra, GIT, JUnit • CxR system links all types of players in the payments industry via single integrations. • For example, a cart or e commerce system linked to the CxR Gateway will have a choice of virtually any payment gateway, PSP, APM (alternative payment method) or acquires. • It also works the other way around, for example, a payment gateway only needs the CxR system to allow any shopping cart, billing, invoicing or e commerce system to be integrated with their services.

AQPC and Xanitos

From 20 Feb, 2019 - 31 Jul, 2019

• Technology stack: Core JAVA, ADF, Oracle Fusion web services (RESTFul). • These projects were mainly focused on the Integration of data to Oracle Fusion cloud. The task was to get the data from any given third-party source and then upload those data on the Oracle Fusion cloud. • We also provided screens to client where they can schedule the process which then can run automatically on the given time for data integration.

Token Minting Platform

From 01 Feb, 2022 - 30 Apr, 2022

• Technology stack: Ethereum, Solidity, Web3.js, ReactJs • This is NFT project where we have created NFT smart contract on Ethereum using ERC721A standard and also provided Minting platform to client developed on ReactJs • Following were the major features we have delievered in this project o

Minting Platform and website on ReactJs o ERC721A implementation o Whitelisted minting (with Merkle tree) with pause feature o Public minting with pause feature o Reveal NFT o Multi wallet withdraw
