Stargate V3

From 01 Mar, 2019 - 30 Jun, 2019

The project was to build an enterprise application omnichannel Cloud Order Management System (OMS) and was built on top of Oracle cloud . Mulesoft was used for integrated enterprise application with SaaS. ADF was used as development framework for developing the UI and writing the business logics.

Integrated Field Operations System (IFOS)

From 01 Jun, 2018 - 31 Mar, 2019

The Integrated Field Operations System (iFOS) is a web and mobile workforce solution developed to support the National Environment Agency's (NEA) operational needs, so that NEA officers can remain fully mobile and perform their tasks on-the-go, and respond swiftly and effectively to environmental and public health incidents. The project included application development and maintenance services of Integrated Field Operations System (iFOS) in which a field officer can create a new task & subsequently carry out inspection of garbage collection across the city. The project included two modules namely Garbage Waste Collection (GWC) & Public Waste Collection (PWC) in which pages and taskflows were developed starting from creation of a new task to submission of inspection. Contribution -^a As ADF developer for developing new task flows and pages as part of fresh module -^a Working on Change Requests and providing the timelines. -^a Root cause analysis and fixing the defects. -^a Using design documents like MD-50, MD-70 and MD-120.
