Experience

AZURE.NetReact Js

About me

Over the last 8+ years, I have gained an extensive web development experience covering varied technologies including React JS, C# .Net MVC/API. I have a good exposure of Azure cloud platform and fair understanding of working with SQL/NoSQL DB

Education

Experience

Technical lead

Bold Technologies, Noida

From 01 May, 2018 - 20 Sep, 2019

Led a team of 7 people to work on a product, 'Cover Letter Builder' which runs on multiple portals in 5 different countries aligning with the company's vision of revolutionizing the career industry

Senior Software Engineer

Bold Technologies, Noida

From 01 Nov, 2016 - 30 Apr, 2018

As a part of the Job Alerts team, I worked on a suite of Email Alert applications which are used by the end user to subscribe for job alerts. The application is capable of seamlessly sending 2-3 million emails daily.

Portfolio

Cover letter builder

From 25 Mar, 2018 - 20 Sep, 2019

Led a team of 7 people to work on a product, 'Cover Letter Builder' which runs on multiple portals in 5 different countries. This is a single page application, built on React Js framework, using .Net Web API at the backend I was involved in the end-to-end delivery of the product with my key responsibilities including:

- â€¢ Collaborating with the Product Manager and other stake holders towards building the product roadmap.
- â€¢ Analyzing new requirements, proposing optimized solutions and constantly working towards feature enhancements and AB Test required in the application.
- â€¢ Analyzing the areas to improve the application and monitoring New Relic for performance optimization.
- â€¢ Worked on a framework to have a component library for common functionalities and published the packages on NPM.

Hunting App

From 01 Oct, 2019 - 28 Feb, 2020

React.js, .Net Core API 3.0, Azure AD B2C, Storage Account, API gateway, Azure DevOps Project involved the scratch implementation of a PWA hunting app along with an API to deal with data pertaining to hunting system.

- â€¢ Implemented the architecture (comprising multiple resources) on Azure Cloud
- â€¢ Discussed the requirements with client, proposed optimized solutions, and constantly worked towards successful delivery
- â€¢ Designed and implemented the code-branch/environments strategy to ensure a smooth delivery lifecycle with a minimal infra cost.
- â€¢ Completed the setup of CI/CD on Azure DevOps
