Experience

React Nativeios (Objective-C/ Swift)Android Developer

About me

Dear Sir/Madam I am writing to schedule an interview for the position of iOS Developer. As someone with nine years of experience developing iOS apps using Objective C,Swift,SQLite,Cocoa Touch and the core iOS frameworks, I think Iâ€™d make a great fit for your organization. My professional experience includes developing iOS and Android apps for clients and completing the various tasks involved with the app development life cycle. I think my professional and educational backgrounds make me an asset to Scratch Mobile Development. Below are my most important skills and qualifications: â€¢ Developed app for client and launched it on iOS App store and Play store â€¢ Created app updates regularly based on user feedback â€¢ Successfully pitched app concepts to non-technical decision makers â€¢ Created app testing standard operating procedures In addition to my expertise in Cocoa Touch and the core iOS frameworks, I have experience working with many third party APIs and libraries. I also have a keen attention to detail and thrive when faced with a challenge. Iâ€™d love the opportunity to further discuss how I could be an asset to Scratch Mobile Development. Give me a call if you are interested in scheduling an interview. Thank you in advance for your consideration. Sincerely, S.Sivachandran
