About me

I am passionate Android app developer with over 5 years of industry experience. I have worked on multiple Android apps which have over 100 million downloads on google playstore. I was instrumental in providing voice control feature to SlingTv app for the Airtv box. I have worked on Byju's: The learning app (world's largest ed tech platform). I was in the team of Byju's which delivered state of the art Android tablet used by thousands of students for learning. Currently I'm looking for part time opportunities in Android app development so that I can use my expertise to the work other than my primary job. I have the experience of developing end to end Android app with the best coding practices. And last but not the least, I have fixed many production level bugs that helped companies to save lots of dollars and retain their customers.
